Waste Minimization/Pollution Prevention:

The Clean Harbors, Hebron, Ohio facility is a TSD facility operating under a RCRA Part B permit granted by the Ohio EPA for the purpose of recycling spent waste solvents. The waste solvents, which are recovered by the facility via fractionalization and or distillation, are shipped back to industry for reuse. Since the incoming waste streams are a valuable feedstock, Clean Harbors is already maximizing solvent recovery to the extent that the materials are economically recoverable. Continued efforts have been made to reduce outbound waste shipments. However,

due to the nature of our business, the more off-site waste recycled at the facility, the more outbound waste is produced. As a recycling company, Clean Harbors is looking to expand recycling and waste minimization projects for industry. By successfully preventing pollution at its source, we can minimize the adverse impact to the environment from waste materials.
